LARIAC CONNECT Usage Over Time

Overview

CONNECT Usage

LARIAC CONNECT Usage (2017- April 2022)

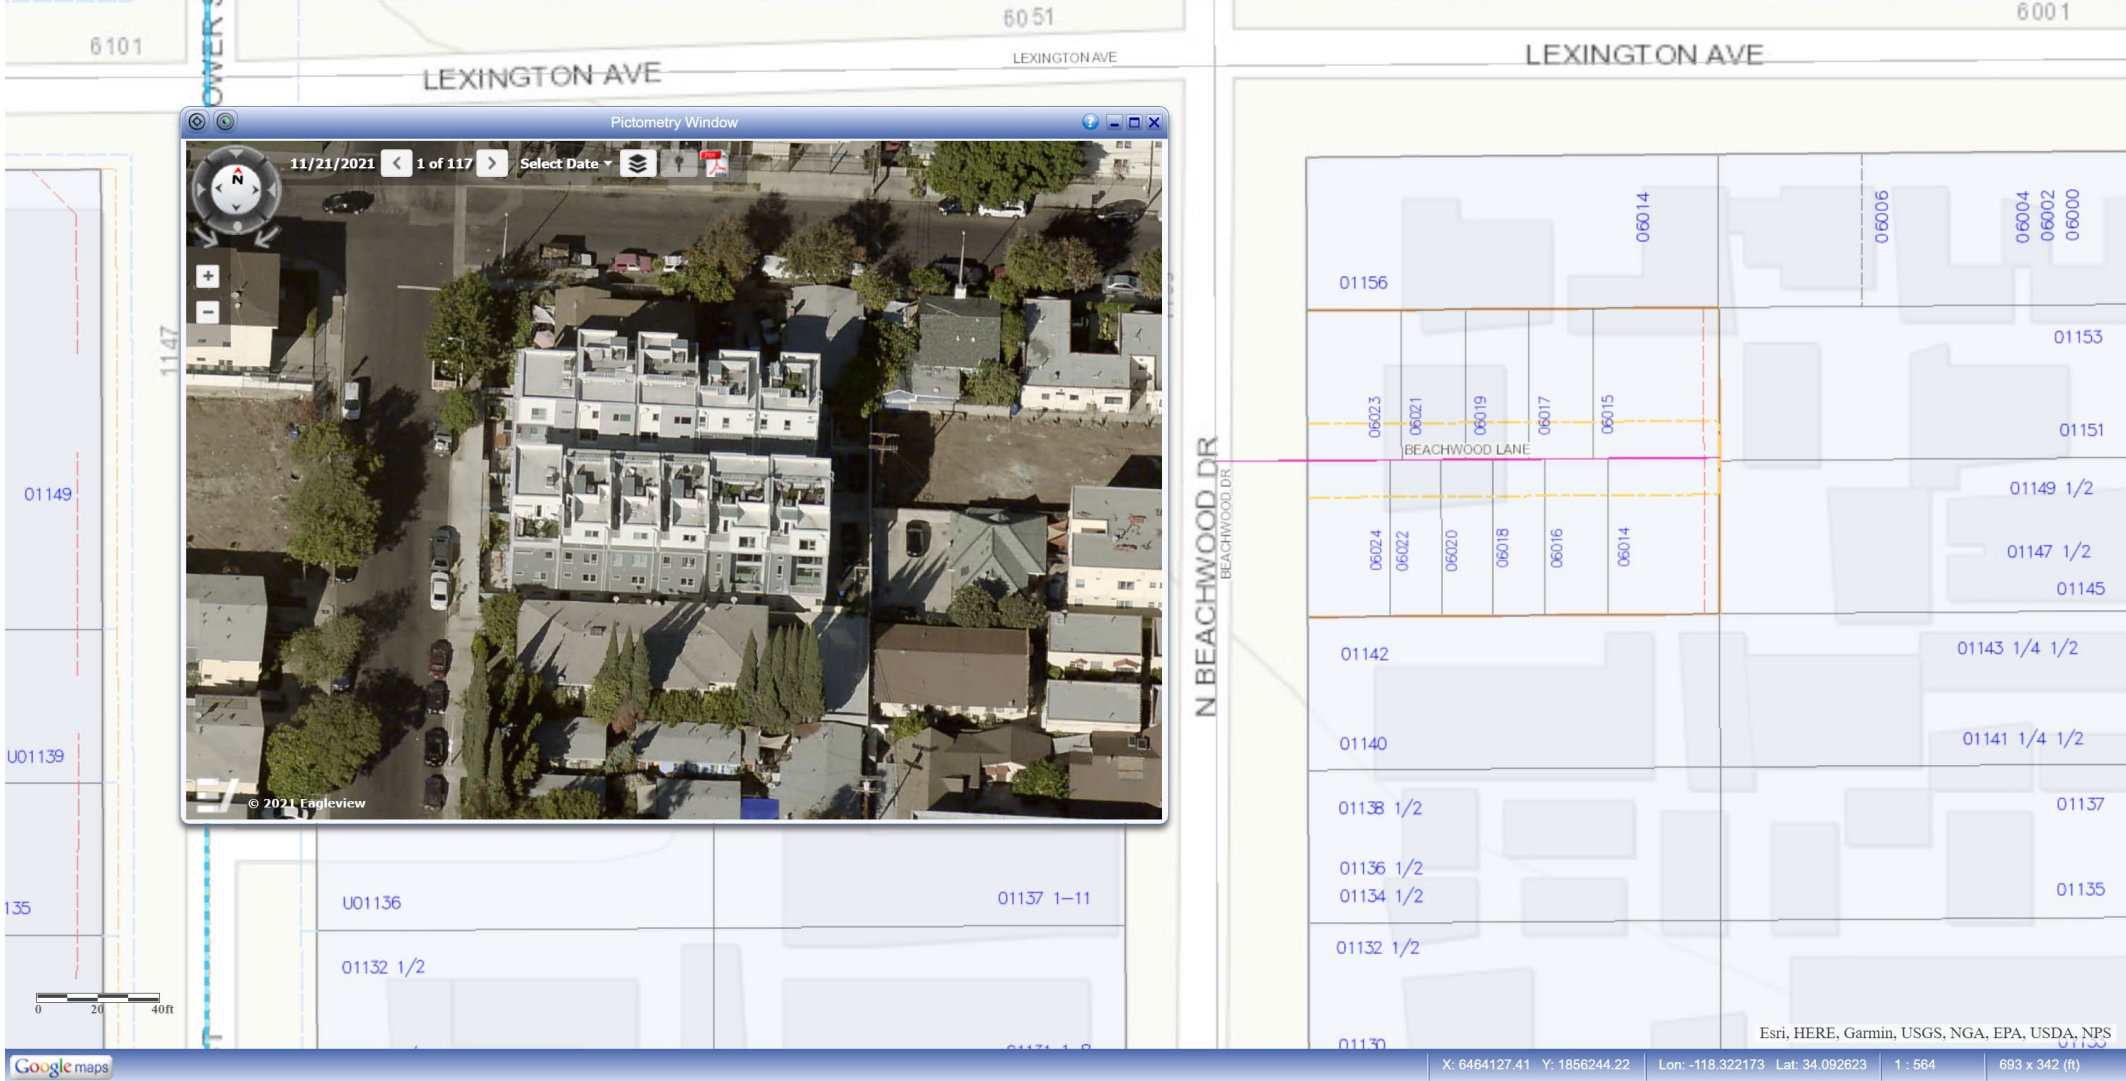

Name	Logins	Image Views	Searches
LA County	22,309,797	27,080,349	15,178,732
Cities (not LA)	96,778	721,366	114,116
LA City	17,669	172,970	14,967
Partner Organizations	2,650	26,194	947
Universities	1,940	23,571	683
Total	587	4059	354

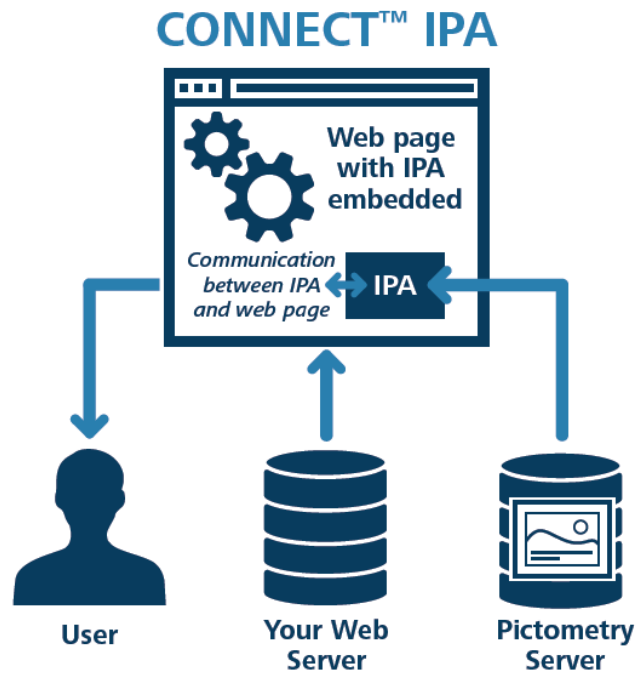

Overview

CONNECT Usage

LA County CONNECT Usage (2017- April 2022)

Name	Sessions
Assessor	390,000
Regional Planning	289,000
Public Works/Development	64,000
Admin	23,000
Sanitation Districts	10,000
Sheriff/Public Safety	7,250
Parks and Recreation	2,172
Public Facing IPA	21,500,000+

Integrated Pictometry® Application (IPA)

- IPA is an API that allows you to embed a window into existing software applications
- Good option for websites and third-party integrations
- A network of partner firms have created off-the-shelf solutions for CAMA systems, Public Works, and 9-1-1 CAD Integrations using IPA

IPA Example

Pictometry Gateway

Retrieves static, discrete images from your online library and imports them to a pre-defined destination:

- Web Applications - <http://firemap.rmwb.ca/>
- Searches
- Reports
- Databases

A machine-to-machine application – no general user interface

Gateway Example

Property Results

Location
128 APPLEWOOD DRIVE FORT MCMURRAY

“Frontage Finder”

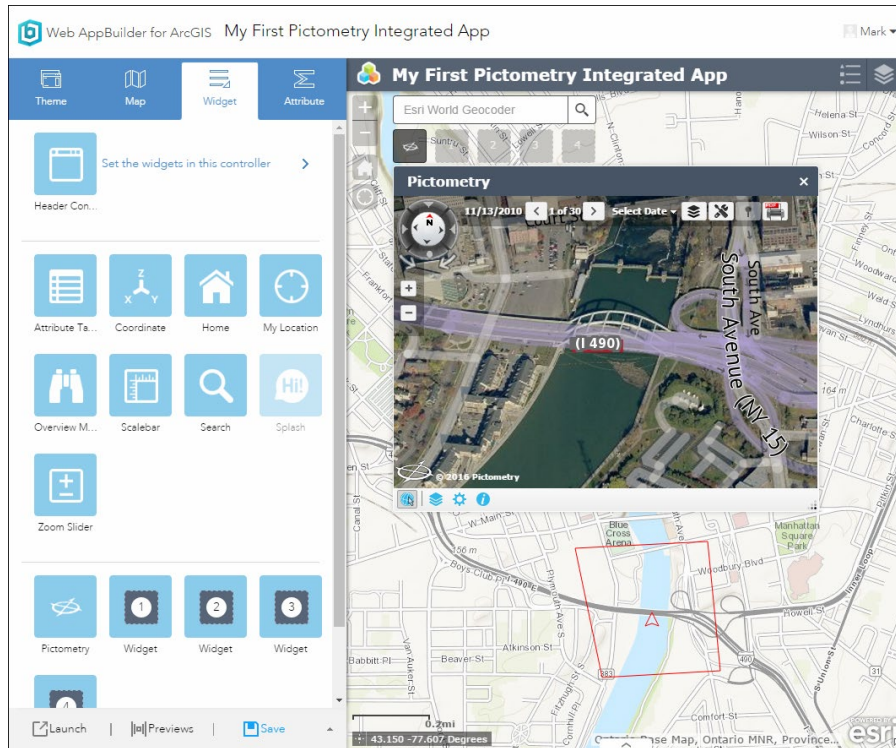

CONNECT Image Service

- Web Map Service (WMS), Web Map Tile Service (WMTS), and Tile Map Service (TMS) protocols, as defined by the Open Geospatial Consortium (OGC).
- Delivery method for orthomosaics only
- This allows the orthomosaics to be used in any GIS package or applications that can consume data published via the WMS, WMTS, and TMS standards.

	Integrated Pictometry Application (IPA)	Pictometry Gateway	CONNECT Image Service
Description	JavaScript Pictometry widget. Add a rich Pictometry viewer to web or desktop applications	Online API for downloading discrete location-focused images.	OGC-Compliant web protocol for serving georeferenced orthophotos
Interface	JavaScript, HTML, iFrame	JSON and XML	HTTP interface
Secure	Yes	Yes	Yes
Use Cases	Integrate a Pictometry viewer for oblique images into webmap or third party software	Call property-focused jpeg/png/gif/tiff/pdf of oblique imagery for websites, reports, CAMA systems, etc.	Consume orthomosaic imagery in website, application, or other third party software

Pictometry for Esri Web AppBuilder (PWAB)

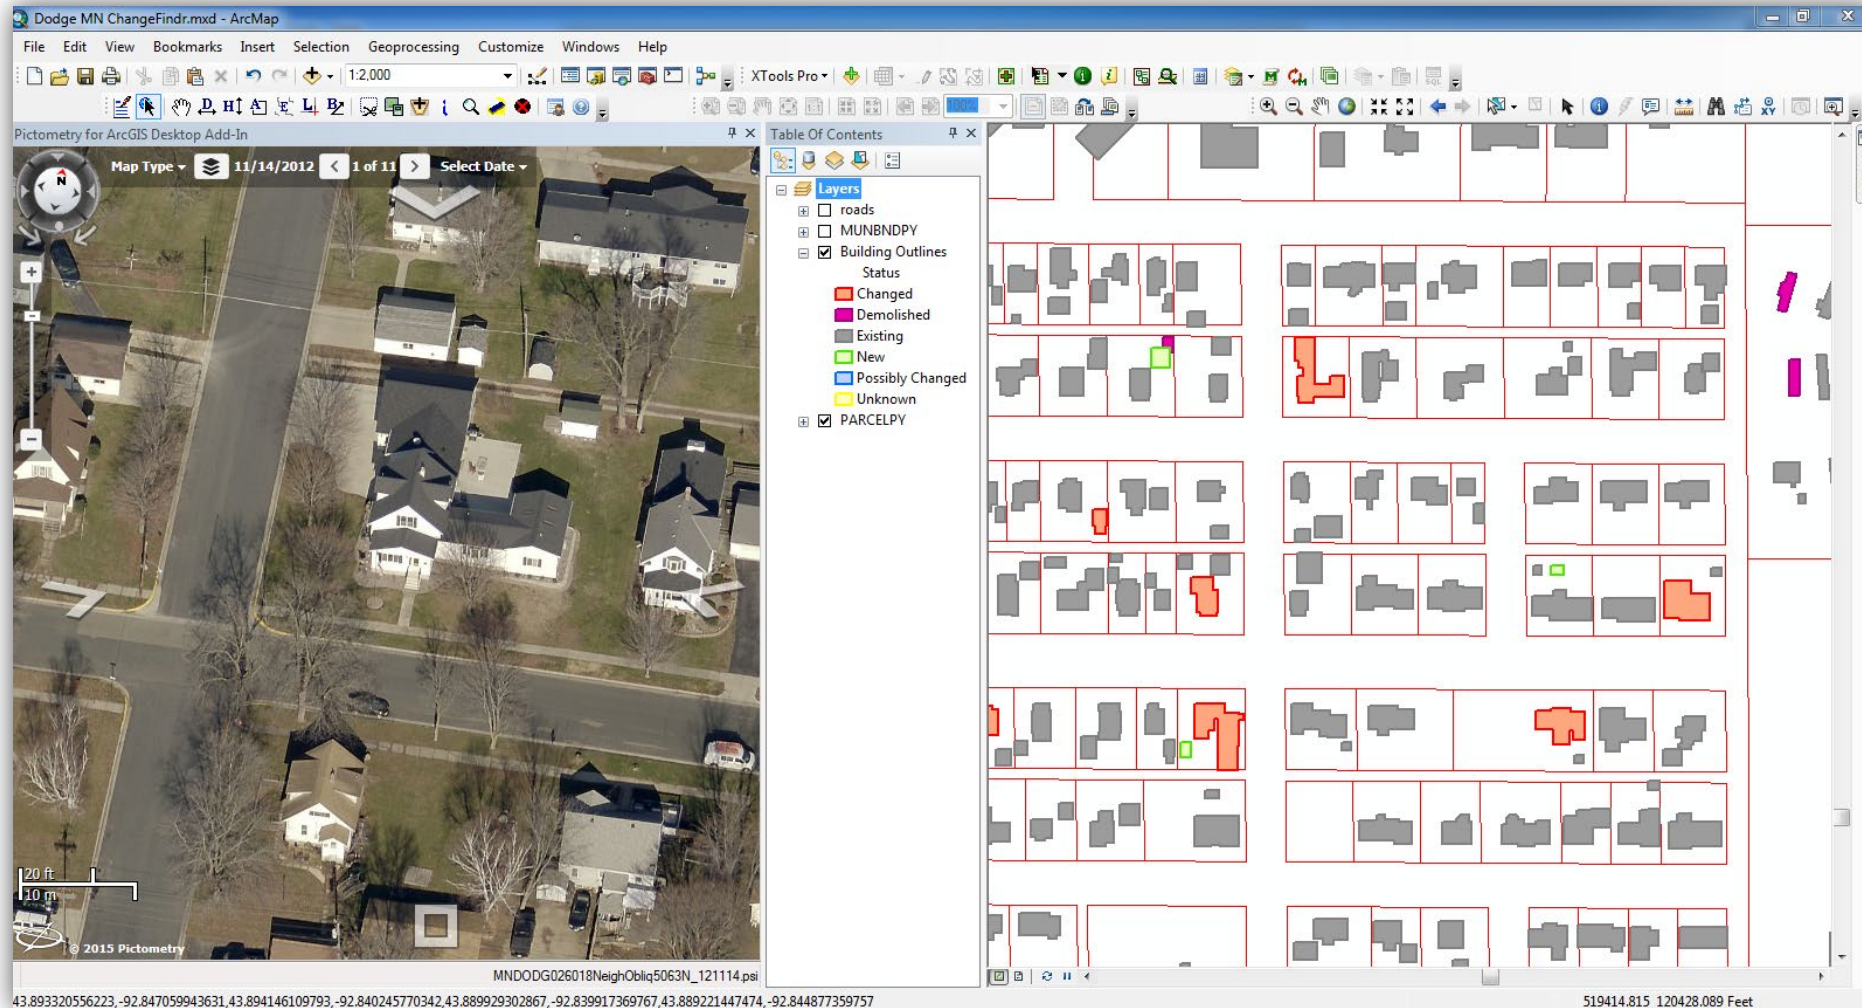

“PWAB” is a server-based widget that allows organizations to incorporate EagleView oblique and orthogonal imagery within web applications created using ESRI Web AppBuilder for ArcGIS (Developer Edition).

PWAB Example

Pictometry for ArcGIS Desktop

View your oblique library from within ArcMap

GIS Upload Your GIS Data

Online

Upload your GIS data files through the web interface. Both Shapefiles and KML/KMZ files are supported.

[Launch Online GIS Uploader](#)

ArcMap

Upload your GIS data files, along with their display configurations, through ESRI ArcGIS Desktop.

[Download Uploader for ArcMap](#)

Desktop

Perform automated updates of your uploaded GIS data files using the Desktop Uploader and Windows Task Scheduler. [Details...](#)

[Download Desktop GIS Uploader](#)

For assistance, contact Customer Support at 855-337-1526, or email customersupport@eagleview.com.

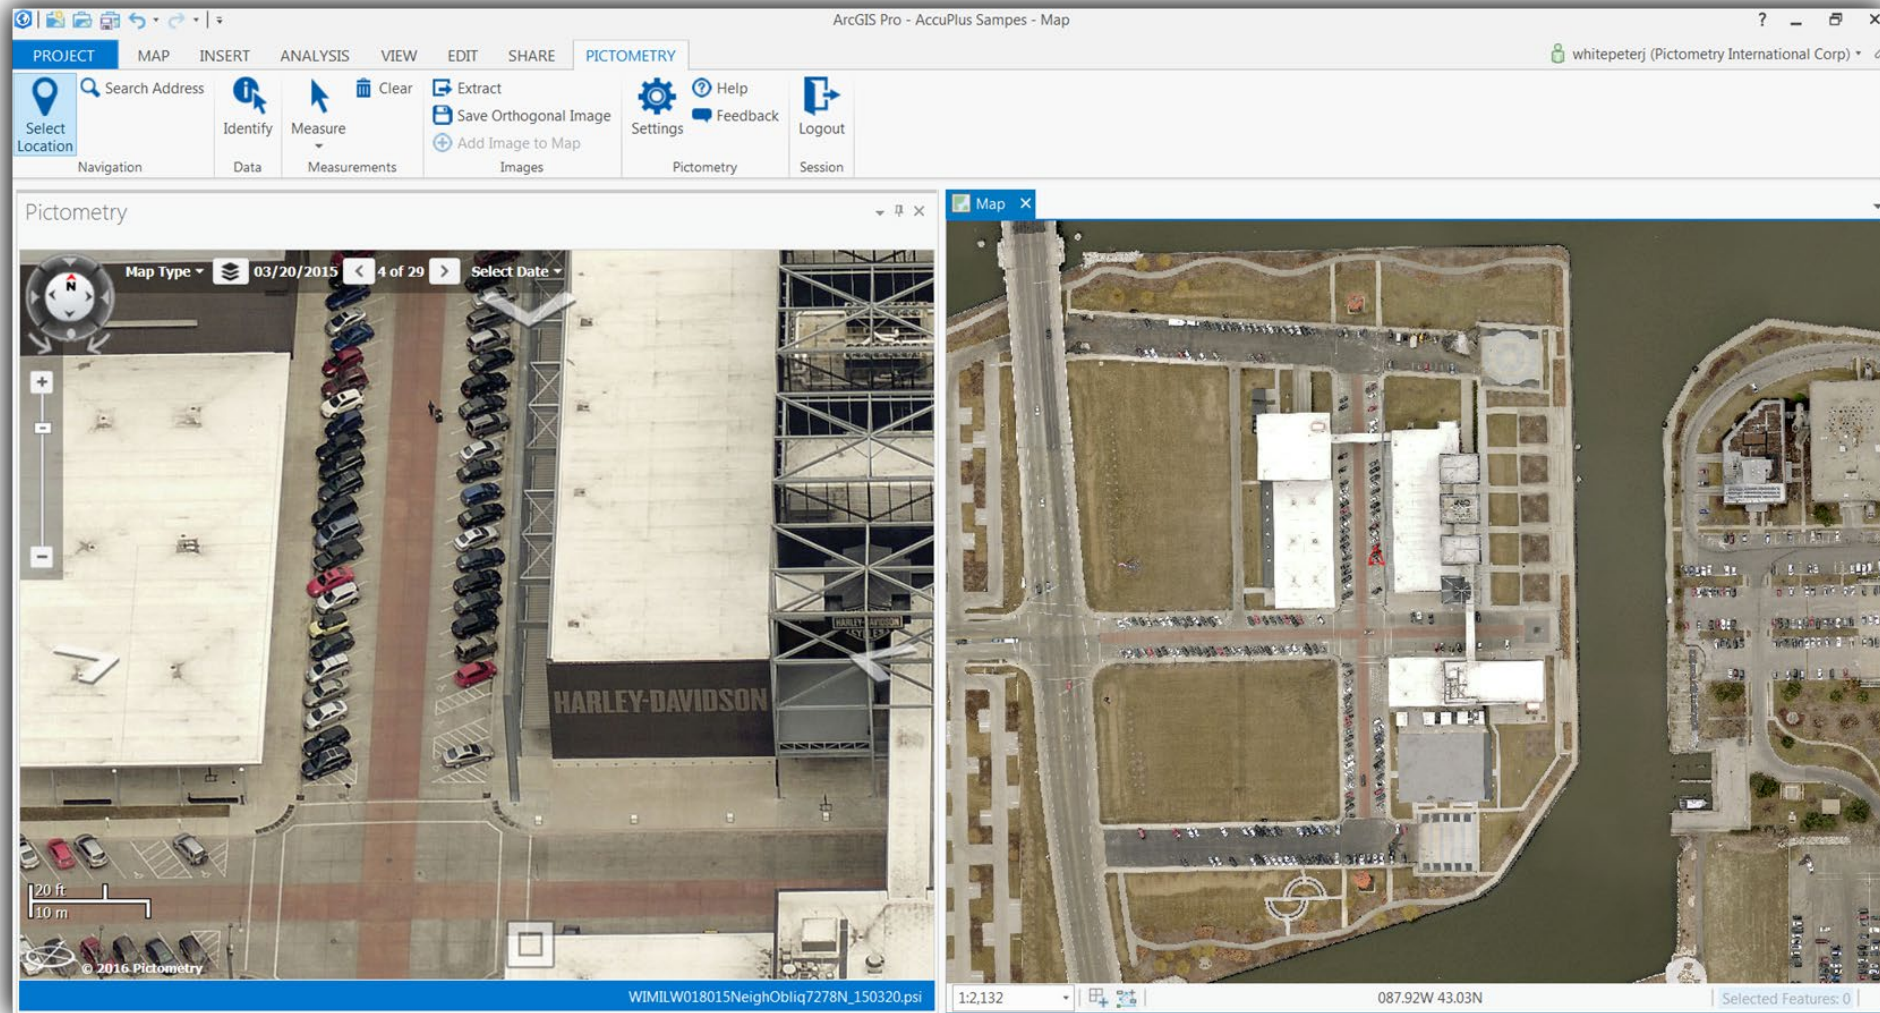

ArcGIS REST Services in Connect

Compatibility with ESRI's REST Services

- Stream GIS data from ArcGIS directly into your Connect account
- Data automatically synchronizes
- Eliminate the need for manual GIS uploads

Pictometry for ArcGIS Pro

View your oblique library from within Pro

3D Mesh Models

View imagery in 3D using ArcGIS Pro, Skyline Terra Explorer, and more

3D Mesh Models

View imagery in 3D using ArcGIS Pro, Skyline Terra Explorer, and more

- Government agencies use geo-referenced [3D mesh](#) layers for urban planning, asset management planning, emergency response planning, land use planning, and more.
 - Measuring distance, area, and volume
 - Visualizing data in 3D environment
 - Creating interactive digital twin
 - Analyzing shade and viewshed
 - Mapping underground infrastructure
 - Creating flood and disaster scenarios
 - Forecasting growth
 - Placing roads, buildings, and facilities
 - Preparing for public safety events
 - And more...

Coming in 2023

Upgrade to our current API that will improve all web products

The screenshot displays a web-based map application. On the left, a 'Views Gallery' panel is open, showing a grid of view options: North, East, South, West, and Overhead. Below these are 'More: Views from South' and 'ADVANCED FILTERS'. The main map area shows an aerial view of Cinderella Castle in Orlando, Florida. A search bar at the top left of the map contains the text '4401 Floridian'. A search results dropdown menu is visible, listing several addresses: '4401 Floridian Way, Orlando, Florida 32830', '4401 Floridian Way, Lake Buena Vista, FL 32836', '4401 Floridian Dr, Fernandina Beach, Florida 32034', '4401 Floridian Way, Orlando, FL 32830', and '4401 Floridian Dr, Panama City, Florida'. The map includes various UI elements such as a search icon, a close icon, a compass, and zoom controls. The date '2019 Jan' is visible at the bottom of the map. The footer of the map contains copyright information: '© EagleView | © 2021 Microsoft Corporation © 2021 Maxar © CNES (2021) Distribution Airbus DS | © Mapbox © OpenStreetMap Improve this map'.

Other System Integrations

EagleView integrates with a variety of other partners and software companies, including dozens of national and locally operating computer-aided mass appraisal (CAMA) systems. Partners include:

[DevNet](#)

[Patriot Properties](#)

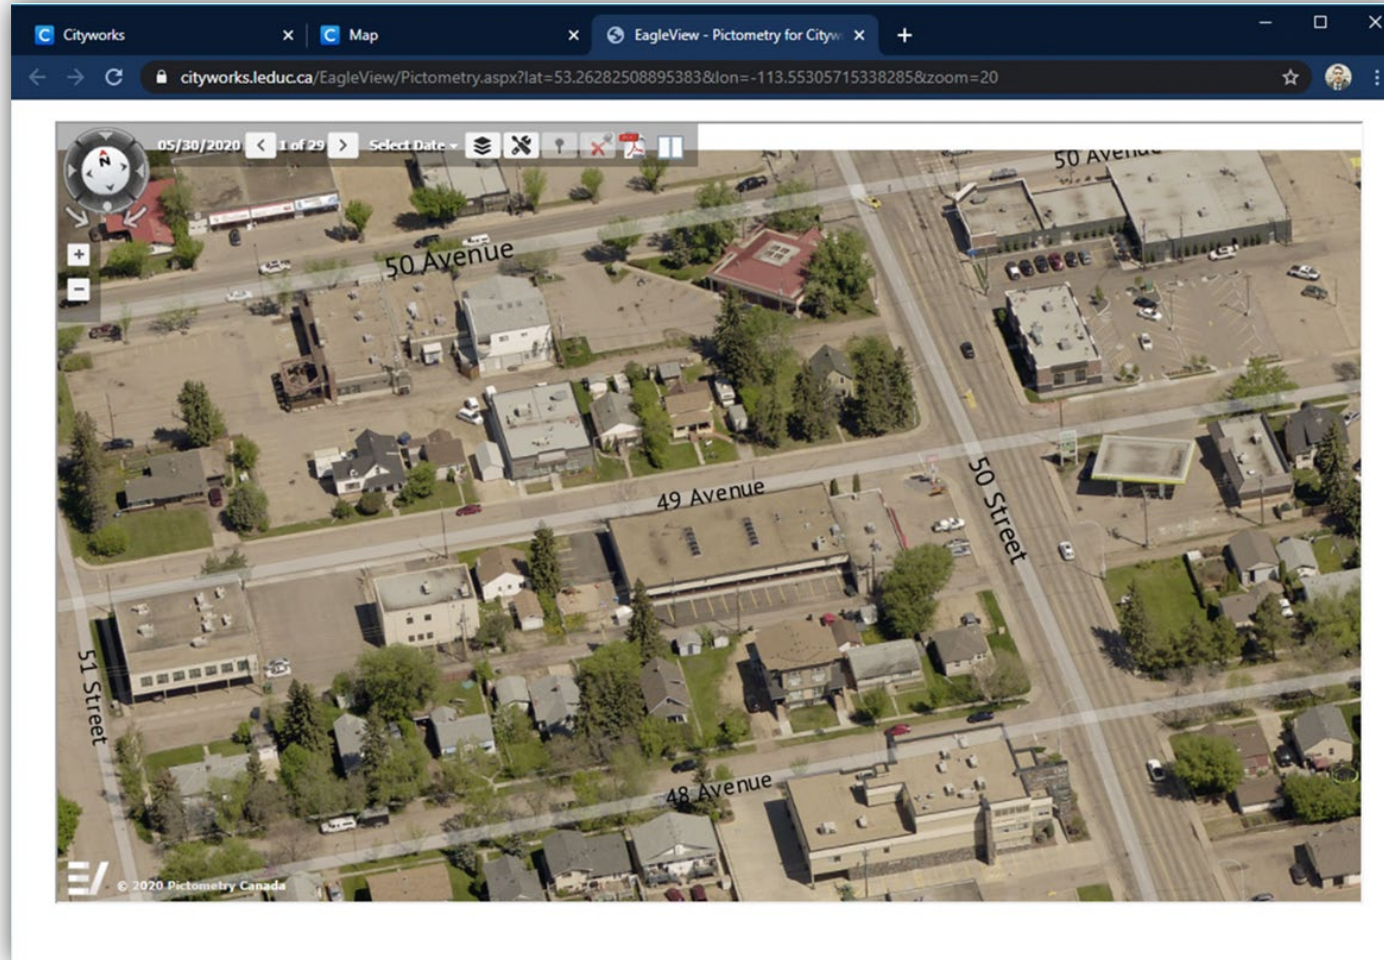

[Thomson Reuters](#)

[Tyler Technologies](#)

[VanGuard Appraisals](#)

Pictometry for CityWorks

High resolution obliques to help identify assets
