GIS DATA COMMITTEE MEETING

Agenda

Wednesday, July 27th, 2022 ~ 2:15pm / eGIS

TOPIC	WHO (TIME)
Welcome / Who's on the Call? Anthony Liu; Phuong-Lan Nguyen; Ellen Walton; 17147338705; Jason Chen; Robert Graham; Rachel R. Marquez; Mauricio Lucero; Diaz, John; Steve Steinberg; Sidra Gardezi; Durga Niraula; Morga, Jennifer; Talar Katoromian; 13238904264; Liza Markey; Natalie Mann; Juan-Raul Cardenas; Norman Wong; Sumaiyah Umarji; Rob Barreras; Michele Fernando; Daniel Hoffman; 13239802007; Christine Lam; Megan Yanez; Junlei (Jimmy) Chen; Nicole Richardson; 16264760728; Nicole Mercier; Nick Franchino; Kolotita Schuck; Tia Morita; 18183839303; John Halaka; Todd Zagurski; Roumel Lagsa; Jordan Cooper; Fady Toma; Tom Weisenberger; John Hickok; Shannon Julius; Mark Greninger; An Dang; Alma Vazquez; Matthew Agustin; Victor Chen; Kyle Williams; Stephanie Todd; My Trinh; Diane Tan	
Announcements - Brown Bag Session tomorrow 7/28 at Noon - Welcome back to Sumaiyah! - Updated trainings & events calendar - https://central.gis.lacounty.gov/2022/07/21/egis-training-schedule-updated-july-2022-dec-2022/ - AGOL Dashboard updated - https://central.gis.lacounty.gov/2022/07/26/arcgis-online-management-dashboard-refresh-july-2022/ - Equity data working group - Google Maps credits Let Nick F know if you'd like to be part of GIS & Equity Working Group – we set up a Team for it (Rob Barreras, Megan Yanez, and Fady Toma joined). GIS Day kickoff meeting happened. Looking for volunteers with the event (follow up with Steve). Google credits re-upped to take us through next contract in September. Challenges tracking exactly who is consuming the most, though some insights (usage quadrupled in last couple years). Discussion of other options (Esri, Nomatim) and formed a Locator/Geocoder working group – reach out Rachel Marquez if interested to join.	Rob
EGISDBP2 SQL Server Update - Upgraded to SQL Server 2017 - Any issues? - Restart tonight at 9:05pm (5-10 minutes downtime) Automated CAMS extracts failing since the upgrade – working to resolve the issues and manually extracting in the meantime. Need to recreate the locator with the new Create Locator tool. Otherwise, the upgrade went smoothly and no other outstanding issues.	Rob

Next Meeting: Wednesday, August 31, 2022 (2-3:30pm)

Updated City Boundaries • Process for adding to repository • Coordinating eGIS and DPW approach From Jimmy Chen: 1. Create eGIS_Boundaries_Political.EGIS.DPW_CITY_BOUNDARIES_NEW_SCHEMA. 2. Each map service owner republishes with eGIS_Boundaries_Political.EGIS.DPW_CITY_BOUNDARIES_NEW_SCHEMA ahead of time, changing any needed configs like pop-ups 3. Schema change occurs on original eGIS_Boundaries_Political.EGIS.DPW_CITY_BOUNDARIES 4. Republish services to eGIS_Boundaries_Political.EGIS.DPW_CITY_BOUNDARIES Focus on minimizing down time. eGIS will give plenty of lead time to adjust/test new schema before changing the main table.	PW / eGIS
Open Discussion • Any other topics or issues to discuss Fady/RRCC – changing some service names and simplifying schema for some services at https://arcgis.gis.lacounty.gov/arcgis/rest/services/RRCC/District_Maps_EGIS/MapServer. Removing "1" from end of some layer names, taking out fields that are not meaningful externally. He'll do an eGIS central post to alert when the changes are happening. Highly recommended Esri session on OSM 3D buildings - https://uc2022.esri.com/flow/esri/22uc/UC2022/page/sessions/session/16517656584080013w9D. Discussions of how we can get more of our data into OSM, specifically tree cover. Open GIS positions posted (Sr. Analyst, Principal, Spec, Manager I) – opening tomorrow 7/28 and accepting applications for roughly 2 weeks.	All
Closing/Action Items
