

How to Share to Equity Hub

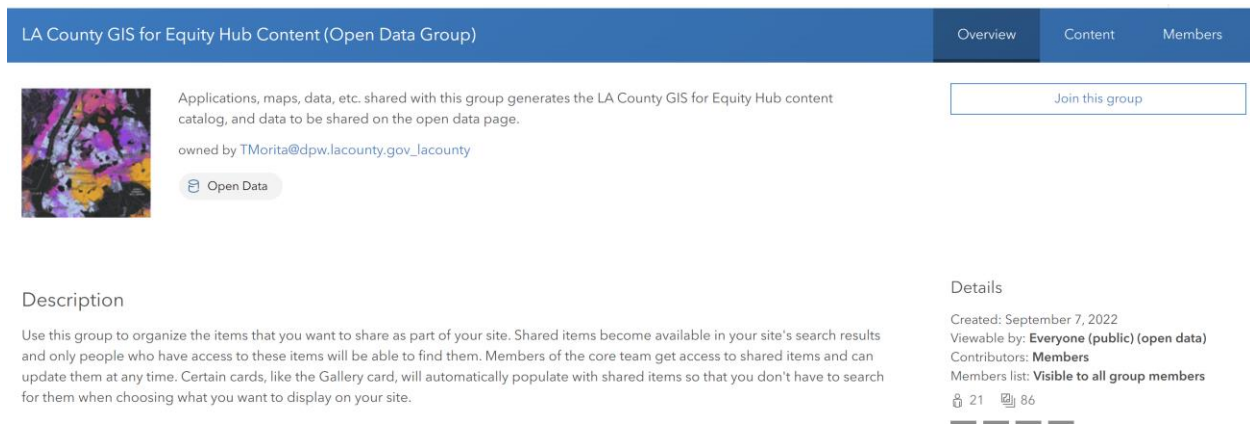

The [GIS for Equity Hub](#) is the central location for sharing GIS data, applications, and tools that are used to inform County equity-related policy and initiatives. Share content here to increase its visibility to county staff, external agencies researching equity issues, and more. This document walks through the details of making content available in the Hub.

Share to the Content Group

For an item to appear in the Hub catalog, it must be shared to the [LA County GIS for Equity Hub Content \(Open Data Group\)](#).

Step 1. Join the Group

- Sign into ArcGIS Online: <https://lacounty.maps.arcgis.com/>
- Navigate to:
<https://lacounty.maps.arcgis.com/home/group.html?id=a543afbe2a7348ac8498d02cfb835c18>
- Click **Join this Group** – this will submit a request which can be approved by a group member

LA County GIS for Equity Hub Content (Open Data Group)

Overview Content Members

Applications, maps, data, etc. shared with this group generates the LA County GIS for Equity Hub content catalog, and data to be shared on the open data page.

Open Data

Join this group

Description

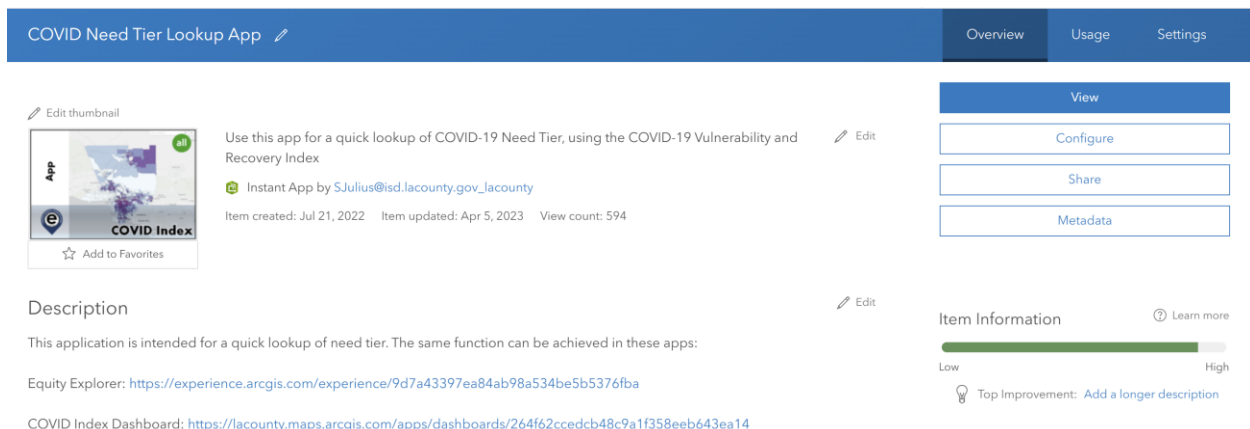

Use this group to organize the items that you want to share as part of your site. Shared items become available in your site's search results and only people who have access to these items will be able to find them. Members of the core team get access to shared items and can update them at any time. Certain cards, like the Gallery card, will automatically populate with shared items so that you don't have to search for them when choosing what you want to display on your site.

Step 2. Share Content

- For an item that you own or have privileges to share, open the item details page ([example](#))
- Ensure all essential item details are filled out as described in the [Anatomy of a Perfect AGOL item document](#)

COVID Need Tier Lookup App

Overview Usage Settings

Edit thumbnail

Use this app for a quick lookup of COVID-19 Need Tier, using the COVID-19 Vulnerability and Recovery Index

Instant App by SJulius@isd.lacounty.gov_lacounty

Item created: Jul 21, 2022 Item updated: Apr 5, 2023 View count: 594

Add to Favorites

Description

This application is intended for a quick lookup of need tier. The same function can be achieved in these apps:
Equity Explorer: <https://experience.arcgis.com/experience/9d7a43397ea84ab98a534be5b5376fba>
COVID Index Dashboard: <https://lacounty.maps.arcgis.com/apps/dashboards/264f62ccedcb48c9a1f358eeb643ea14>

Item Information [Learn more](#)

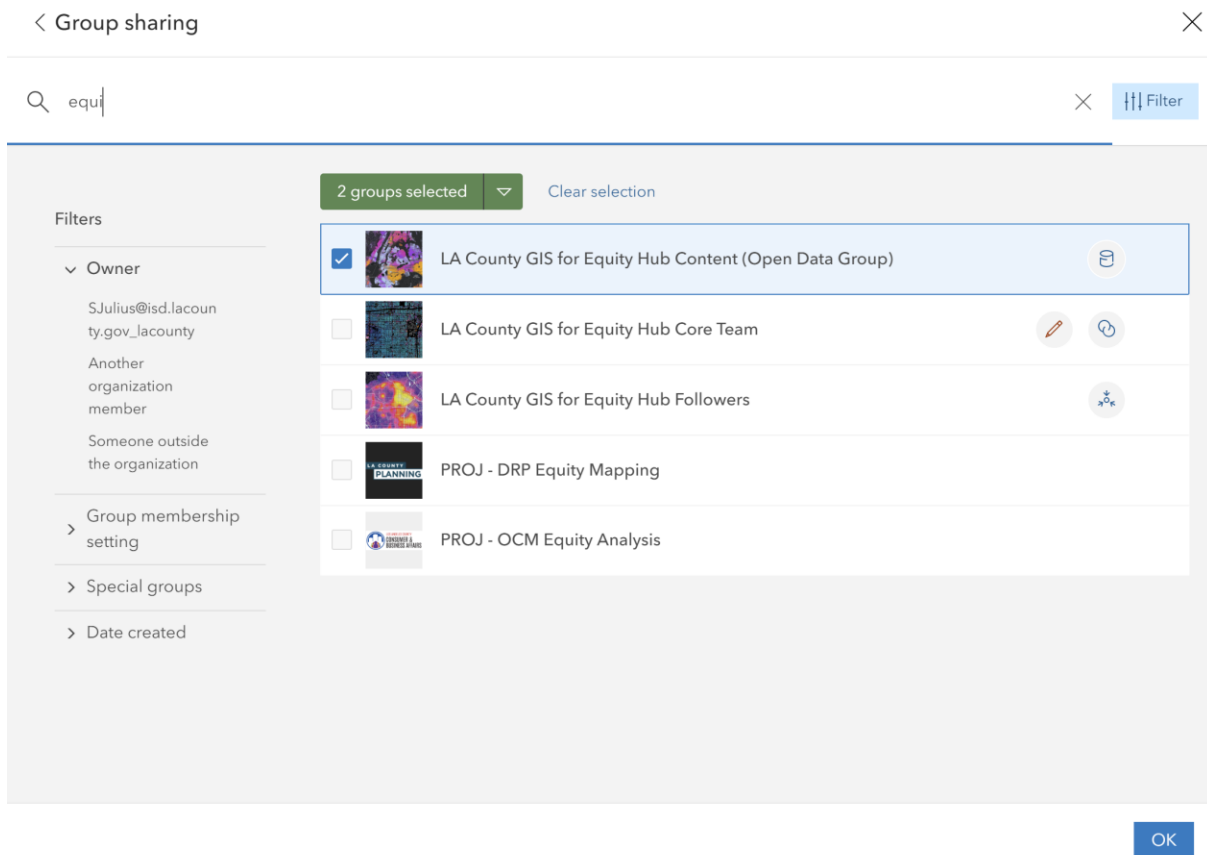

Low High

Top Improvement: Add a longer description

- **Click Share**

- Click **Organization** if you only want the item to be visible to signed in users or **Public** if you want the item to be visible to anonymous public users
- Click **Edit group sharing**
- Check the box next to **LA County GIS for Equity Hub Content (Open Data Group)**
- Click **Save**

Review Item Tags

All items shared to the Hub Content group will appear in the [Hub Catalog](#). Search bars and buttons throughout the Hub site direct users to the Hub Catalog.

Search by Keyword

Search catalog of equity-related GIS content

[Browse all equity-related data](#)

Other parts of the site direct users to content by category or department.

Step 1. Find your item's tags

- Navigate to the item details page ([example](#))
- **Tags** are listed on the right side of the screen, below Categories and above Credits
- Click **Edit**

Categories 

This item has not been categorized.

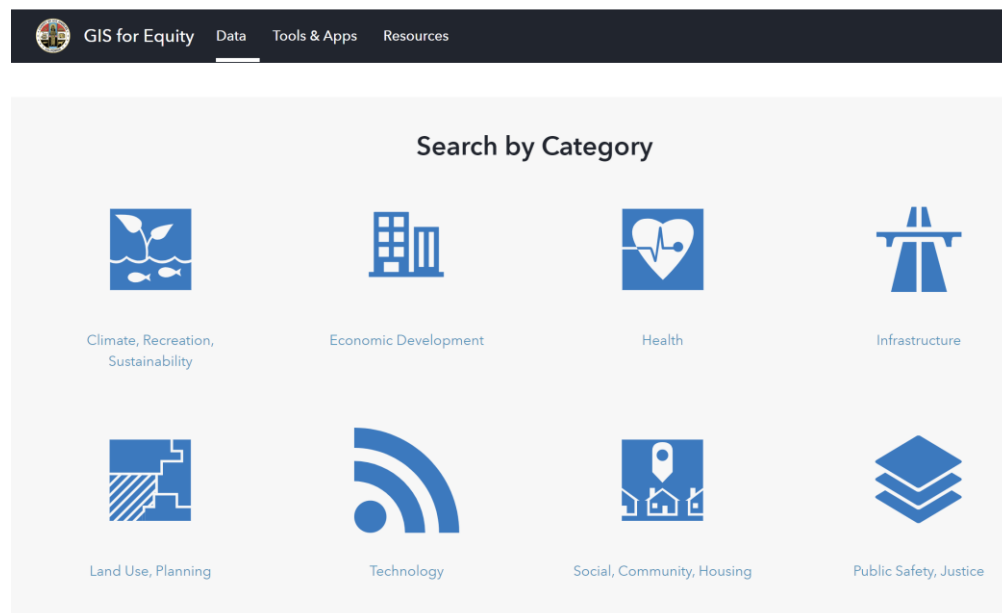

Tags 

ARDI, COVID, Los Angeles County, Recovery, equity, COVID-19, Need Tier, health, community, isd

Credits (Attribution) 

Step 2. Add one or more topic categories

For your item to appear when users search by category, add tag(s) with one or more of the words listed in the gallery on the [Data](#) page of the Hub, for example: **Climate**, **Health**, or **Justice**.

The screenshot shows the top navigation bar with the following items: GIS for Equity, Data (underlined), Tools & Apps, and Resources. Below the navigation bar is a section titled "Search by Category" which contains eight category icons arranged in a 2x4 grid:

- Climate, Recreation, Sustainability
- Economic Development
- Health
- Infrastructure
- Land Use, Planning
- Technology
- Social, Community, Housing
- Public Safety, Justice

Step 3. Add a department

- Review the departments listed on the [Tools & Apps page](#) of the Hub
- If your department is listed, give your item a tag with the department acronym, i.e. **dph** or **drp**
- Note that most departments are highlighting apps or maps in this section rather than datasets, so a hosted feature layer with a department tag may not appear in the Tools & Apps page but will still appear in the Hub Catalog.

The screenshot displays the 'Public Health' section of the GIS for Equity Hub. On the left, there is a sidebar with 'Content Types' (Apps, Dashboards, StoryMaps, Feedback, Datasets, Sites, Pages, Maps, Documents, Templates) and 'Sharing' options (Private, Organization, Public). Below these are 'Tags' with a search box containing 'dph' and 'ph'. The main content area shows four map items, each with a title, a description, and a green 'all' tag. The items are:

- Available Recreational Space (Acres per 1,000 Population) in Los Angeles County**: The map shows the Available Recreational Space (Acres per 1,000 Population) results in Los Angeles County.
- Percentage of Population Living in Close Proximity to a Grocery Store in Los Angeles County**: The map showcases the Percentage of the Population Living in Close Proximity to a Grocery Store in Los Angeles County.
- Percentage of Obese Adults (18 Years or Older) in Los Angeles County**: The map shows the percentage of adults in Los Angeles County by City/Community and by...
- Life Expectancy at Birth (Years) in Los Angeles County**: This map shows the Life Expectancy at Birth (Years) results for the 2018 Communi...

If your department is not listed, it can be added in a new row (if your department will have 3+ content items in its section) or added to the **Other Departments** category. Reach out to the [GIS & Equity working group on Teams](#) to implement one of these options.

If you are adding an external app ([example](#)), give the item a tag of **external**, and it will appear in the **External Agencies** row.

That's it! Enjoy the GIS for Equity Hub and share.
